- (54) Title: SYSTEM FOR STORING DATA AND METHOD FOR RECORDING DATA**

**(57) Abstract:** A system for storing data forming a single file (61) recorded as an undivided file or recorded in fragments (61) on a data area has a separate file (E) containing information related to the single file (61). Location of the separate file (E) recorded on the data area is not predefined. The separate file is a set of tables consisting of at least one table of records containing at least one record and/or a record (75) of records table (E) of table extension (EO) and/or records (96) table containing at least one record of single file fragments and records of records table of table extension and/or a set of records of single file fragments, and the number of tables of further table extensions is not limited.
